3 stations · 36", 48" or 60" beams

120° S-Shape

2 stations · 36", 48" or 60" beams

120° Dogbone

6 stations · 36", 48" or 60" beams

How it works

Posts stand on a square base or a flat foot and connect with finished power beams. Each run takes power from one base power entry kit at the floor, or from a ceiling power pole, and carries it inside the beams from post to post. Desks are freestanding sit-stand bases set alongside the beam, so every station adjusts on its own. Electrical connection is quoted separately and completed by a licensed electrician.

Ordering

Every project is quoted to your plan, including freight, delivery and installation, with free space planning. New furniture typically ships 4 to 6 weeks from an approved order. Request pricing or finish samples at officestation.com/new-office-furniture/os-power-wall/.
