OVERVIEW

The corner office, reimagined

OS Summit pairs the presence of a traditional executive desk with the freedom to sit or stand. Wrap-around wood-grain panels frame the workspace on three sides, while a triple-motor steel frame lifts the entire L-shaped surface smoothly and quietly.

Rounded corners, clean lines and a natural textured laminate give it an understated, professional look that suits private offices, conference corners and reception suites alike.

Triple-motor lift

Three motors and 3-stage legs carry up to 397 lb, faster, smoother and quieter than single-motor desks.

25.5" of travel

From 23.9" to 49.4" (frame) to fit seated and standing users of nearly any height.

Smart keypad

LED display, three memory presets, child lock, sit-stand timer, auto-sleep and adjustable height limits.

Anti-collision

The desk senses an obstruction and retracts automatically to protect people and property.

Wrap-around privacy

Three-sided leg panels and an optional curved modesty panel that keeps cables hidden at any height.

Whisper quiet

Operates at 50 dB or less, so it never interrupts a call or a meeting.
